

Instructions for Printing Documents for Clean Air Act Lesson

The PDF file of primary source documents is quite extensive. A teacher may wish to read through the documents for background information, however for this activity you will only need the following pages:

Pages 1-2

Pages 6 -11 (some of these pages are just fun to see – i.e. Causes of death)

Pages 19-20

All pages will be part of the classroom activities available at the George Bush Library and Museum as part of this lesson plan.
